# Design Your Own Cookie App!

Join us for a hands on computer science experience!  
Using Microsoft & Moxtra technology we will create a web application  
program as a way to sell more cookies!

Facilitated by mentors from the **Hacker Fund**, this program  
will provide a fun environment for students to learn how to use  
software programs.

**If seeing is believing, then imagine what a hands-on  
immersive experience can do!**

**Morning Session**  
10:00 am—12:30pm

**Grades 6—12**

**Afternoon Session**  
1:30pm—4:00pm

**Microsoft Playa Vista**  
**Playa Vista, CA**

Both sessions are the same program, you  
can choose which session to attend.

Questions about the program?
